GE Versamax Series Service Manual

IC200TBM002

1. Description

The GE Fanuc IC200TBM002 auxiliary I/O terminal strip is a Versamax terminal strip. It provides an interface between the carriers and interposing terminals from the same Versamax series.

2. Specifications

Specification	Value
Brand	**GE Fanuc**
Series	**Versamax**
Part	**Number IC200TBM002**
Type	**I/O Terminal strip**
Terminals	**18**
Terminal	**types Internally bussed IEC**
Style	**Box-Style**
DIN	**Rail Compatible**
Panel	**Mounting Compatible**
Wiring	**Compatible with AWG #14 to #22 or two AWG #18**
Wiring	**Material Copper rated for 90 degrees Celsius**
Protective	**Door Yes**
Printed	**Wiring Card Yes**
The	**IC200TBM002 terminal strip is an auxiliary I/O terminal strip that has been designed to be used with the carriers and interposing terminals from the VersmMax series of Modules by GE Fanuc. This terminal strip comes with a box-style design and it can be used with thermocouple modules. When using this terminal strip, it comes with a clear and protective door that covers the wiring area of the terminal. The GE Fanuc Automation IC200TBM002 auxiliary I/O terminal strip can be mounted on the same DIN rail as the connector-style carrier or on a separate DIN rail if there is no space on the existent one. Another way to install this terminal strip is to mou**

3. Product Information

The GE Fanuc IC200TBM002 auxiliary I/O terminal strip is a Versamax terminal strip. It provides an interface between the carriers and interposing terminals from the same Versamax series.

Technical specifications for IC200TBM002

Brand GE Fanuc

Series Versamax

Part Number IC200TBM002

Type I/O Terminal strip

Terminals 18

Terminal types Internally bussed IEC

Style Box-Style

DIN Rail Compatible

Panel Mounting Compatible

Wiring Compatible with AWG #14 to #22 or two AWG #18

Wiring Material Copper rated for 90 degrees Celsius

Protective Door Yes

Printed Wiring Card Yes

The IC200TBM002 terminal strip is an auxiliary I/O terminal strip that has been designed to be used with the carriers and interposing terminals from the VersmMax series of Modules by GE Fanuc. This terminal strip comes with a box-style design and it can be used with thermocouple modules. When using this terminal strip, it comes with a clear and protective door that covers the wiring area of the terminal. The GE Fanuc Automation IC200TBM002 auxiliary I/O terminal strip can be mounted on the same DIN rail as the connector-style carrier or on a separate DIN rail if there is no space on the existent one. Another way to install this terminal strip is to mount it on a panel. It is important to determine whether the application requires resistance to mechanical vibrations so that the terminal can be installed in a way that allows it to withstand the operational conditions of the applications.

The GE Fanuc Automation IC200TBM002 auxiliary I/O terminal strip can be wired with one solid stranded cable with an AWG rating between the #14 and #22. Two wires with a gauge of up to AWG #18 can also be used with this specific terminal. The GE Fanuc Automation IC200TBM002 auxiliary I/O terminal strip comes with 18 wiring terminals, and these terminals are internally bussed and they come with an IEC box-style design. These can be used to provide extra space between the terminal I/O carriers and the interposing I/O terminals. The terminal strip comes with tabs that can be used to attach the terminal to a previous carrier and a slot that works for the next terminals.
