IC695CMU310-CJ

GE Fanuc / GE Intelligent Platforms (now Emerson) · PACSystems RX3i

---

Hot Standby redundant CPU module for PACSystems RX3i.

Hardware

Processor: 32-bit, 300 MHz
Boolean execution: 0.195 ms per 1000 instructions
Redundant: Yes

Memory

User RAM: 10 MB battery-backed
Non-volatile Flash: 10 MB

Communication

Serial: RS-232 and RS-485
Ethernet: 10/100 Mbps auto-negotiation

Electrical

Supply voltage: 5 V DC from backplane

Physical

Dimensions (H×W×D): ~178 × 127 × 51 mm (RX3i module, supplier-reported)
Weight: Not available

Lifecycle

Official Emerson production status unverified; currently available in aftermarket channels (Last verified: 2026-09)
